## **ANNUAL STATISTICAL REVIEW SUMMARY**

During Fiscal Year 1972, expanding Federal Food assistance programs benefited additional thousands of needy children and adults. The programs are divided into two areas: Family Food Assistance (Food Stamp, Food Certificate, Food Distribution, and Supplemental Food) and Child Nutrition (School Lunch, School Breakfast, Special Food Service, Nonfood Assistance, and Special Milk). Highlights of Fiscal Year 1972 include:

- Program recipients in all Food and Nutrition Service Programs totaled 59.5 million, up over one million from Fiscal Year 1971. (Over-lapping in participation occurs in these Programs.)
- The average government subsidy in food and/or cash per recipient increased by over 25 percent from the previous year.
- Government expenditures for Food and Nutrition Service Programs reached \$3.4 billion—up nearly 18 percent from Fiscal Year 1971.
- A Family Food Assistance Program was available to the population in 3,119 of the Nation's 3,129 counties and independent cities as of June 1972. A Family Food Assistance Program was available to the eligible poor in areas having 99.9 percent of the U. S. population.
- About 8.3 million children were reached with free or reduced price lunches during Fiscal Year 1972, a gain of nearly 14 percent from Fiscal Year 1971.

All programs of USDA's Food and Nutrition Service are available to everyone, regardless of race, color, religion, sex, or national origin.

## HIGHLIGHTS

The various Child Nutrition Programs are designed to fill nutritional gaps in the diets of the Nation's schoolchildren. The primary target group is the children from low-income families. However, the effect is to improve the nutrient intake of all children who participate—by setting minimum dietary standards for participating cafeterias.

These programs reach children in public and non-profit private schools, child care centers, settlement houses, summer day camps and recreation centers, in every State and Territory of the United States.

Federal funds for Child Nutrition Programs are apportioned among the States to be used in reimbursing schools for part of the cost of food they purchase. Funds provided by Section 4 of the National School Lunch Act and used in a State for reimbursing schools must be matched with funds from sources within the State at a rate determined by law.

Child Nutrition Programs are administered in cooperation with state departments of education. The laws of about 40 percent of the States and Territories do not permit the state educational agency to administer the Program in nonprofit private schools. In these States such schools may enter into an agreement directly with the Department of Agriculture.

Approximately 80 percent of the food used in the programs is purchased locally by participating schools. The remaining 20 percent is purchased as commodities by the U.S. Department of Agriculture.

The Program with the widest coverage, The National School Lunch Program, was available to nearly 85 percent of the Nation's schoolchildren during Fiscal Year 1972, up from 83 percent during Fiscal Year 1971.

Federal expenditures of \$1.2 billion for Child Nutrition Programs represented an increase of 25 percent over Fiscal Year 1971. Of this amount, \$908 million was cash. The remaining \$315 million was Federal commodity outlay.

Fiscal Year 1972 highlights include:

- Total meals of 4.3 billion—includes lunches, breakfasts, and Special Food Service meals. This was 5.7 percent above Fiscal Year 1971's 4.1 billion.
- Ninety-two percent of total meals were school lunches.
- The 8.3 million children receiving free or reduced-price lunches were one million (14 percent) above Fiscal Year 1971.

## HIGHLIGHTS

Since 1946 the National School Lunch Program has made it possible for schools throughout the Nation to serve nutritious lunches at reasonable cost or at no cost. The Type A Lunch required by the Program is designed to meet one-third of a child's Recommended Dietary Allowance.

When the Program began in 1947, it was available in less than one-fourth of the Nation's schools. In Fiscal Year 1972, that figure was 70 percent. In 1947, one-fourth of all U.S. schoolchildren participated in the School Lunch Program. By 1959, one-third of the students were participating, and by 1972 almost half of all students participated.

Participation in the National School Lunch Program reached a peak of 24.9 million students in Fiscal Year 1972. This represents 56.7 percent of the children enrolled in schools having the Program.

Significant expansion was made in Fiscal Year 1972 in the number of children reached with free or reduced-price lunches. At the same time, emphasis was placed on expanding the National School Lunch Program to all schools without food service.

The enactment of Public Law 92-153 brought a major change in the financing of lunches served under the Program. For each Type A lunch, a minimum statewide average cash payment of 6 cents was available, with additional assistance based on a payment of up to 40 cents for each lunch served free or at a reduced price, and up to a maximum payment of 60 cents in especially needy schools.

Fiscal Year 1972 Program highlights:

- Some 83,000 schools—over 3,000 more than the previous year—had the Program available.
- The total cost of the Program including USDA-donated food was over \$2.7 billion for the almost 4.0 billion lunches served during the year. The Federal contribution was more than \$1 billion, or about 38 percent of total program cost.
- The Federal contribution per lunch averaged 26.3 cents, of which 18.6 cents was cash and 7.7 cents represented the Federal cost of donated foods.
- About 8.3 million needy children were reached with almost 1.3 billion free or reduced-price lunches. These lunches accounted for nearly one out of every three lunches served during the year.

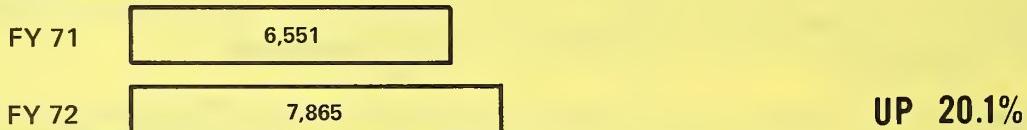

Compared to a year earlier

- The total cost of the Program was up 10 percent.
- Federal contribution per lunch was up 25.8 percent.
- The number of free or reduced-price lunches served was up 27.8 percent.

## FEDERAL COST PER BREAKFAST

## HIGHLIGHTS

The School Breakfast Program was established by the Child Nutrition Act of 1966.

The Program offers schools a cash reimbursement for each breakfast, technical assistance and guidance to establish and operate a program, USDA-donated foods, and additional financial assistance in cases of severe need.

In Fiscal Year 1972, reimbursement of 15 cents was provided for each breakfast. For an especially needy school, reimbursement may be authorized to finance up to 80 percent of the cost. The majority of schools with a Breakfast program qualify as needy and receive additional assistance. Over three-fourths of all breakfasts served are provided to needy children free or at a reduced price.

The food requirement of the Program includes milk, fruit or juice, bread or cereal, with a protein food such as meat, egg, poultry, fish, cheese or peanut butter served as often as possible. Approximately 3 cents of the Fiscal Year 1972 average Federal outlay of 17.7 cents per breakfast was for commodities; the remainder of the food served was purchased at the State or local level.

The principal program focus in Fiscal Year 1972 was on reaching needy children, children having to travel long distances to school each day, and children of working mothers or from low income families for whom there was a special need to improve nutrition and diets.

Public Law 92-32 enacted in June 1971 extended the Program through Fiscal Year 1973 and required the application of the same free and reduced-price meal provisions as in the School Lunch Program.

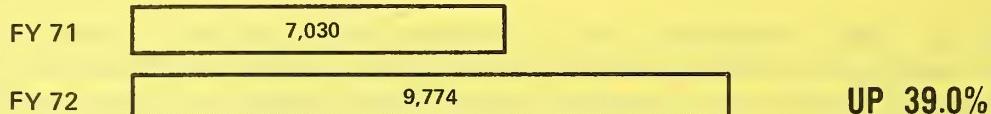

### Fiscal Year 1972 Program highlights

- The peak number of participating children—1.1 million—was almost 19 percent above Fiscal Year 1971's 960,000.
- The \$30 million federal outlay for the Program was a 30 percent increase over Fiscal Year 1971's outlay of a little over \$23 million.
- Nearly 79 percent of total breakfasts were free or reduced price in Fiscal Year 1972—3 percent more than in Fiscal Year 1971.
- In Fiscal Year 1972, 7,865 schools provided a Breakfast program, versus Fiscal Year 1971's 6,551.

## FEDERAL COST PER MEAL

## HIGHLIGHTS

In 1968, Congress initiated the Special Food Service Program as a pilot project, authorizing the Secretary to meet a large portion (up to 80 percent) of the program costs through cash reimbursement and surplus commodity donation. This program for children offers assistance to States in initiating, maintaining or expanding nonprofit food programs for children in non-school public and nonprofit private institutions.

Generally needy pre-school children benefit by participating in the year-round program where they receive one or more of the following—breakfast, lunch, supper, and meal supplements. Needy school-age children benefit by participating in the 'summer-only' program which is targeted in low-income areas.

Public Law 92-32, extending the Program through Fiscal Year 1973, was in effect only the last 4 months of Fiscal Year 1972 (March 1972 forward). Therefore the law's provision allowing severely needy institutions to meet their 20 percent portion of operating costs with in-kind contributions probably had minimal effect during Fiscal Year 1972. Nevertheless, numbers of total participants in Fiscal Year 1972 showed almost a 73 percent increase over Fiscal Year 1971.

In Fiscal Year 1972, reimbursements of 15 cents for breakfasts, 10 cents for between-meal supplements, and 30 cents for lunch or supper were available to participating institutions. Maximum reimbursement rates of 20 cents, 15 cents, and 60 cents, respectively, were available for such meals served in especially needy service institutions approved for financial assistance of up to 80 percent of the operating costs of their food service programs.

### Fiscal Year 1972 Program highlights:

- The Program reached nearly 1.3 million children—up from 752,000 in Fiscal Year 1971. Included in the Fiscal Year 1972 total were some 1.1 million 'summer-only' participants, with the remaining 0.2 million in the year-round program.
- Outlets totaled 9,800—2,800 more than the previous year.
- Total meals increased 60 percent to over 176 million, up 66 million from Fiscal Year 1971. Of total meals, 73 million were summer-only, and 103 million were year-round.
- The federal contribution totaled \$40 million—76 percent or \$23 million over Fiscal Year 1971. Of the Fiscal Year 1972 total, over \$37 million was cash. The cost of Federally-purchased commodities used in the Program totaled almost \$2.7 million.
- Federal contributions averaged about 22.5 cents per meal. This compares with 19.9 cents for Fiscal Year 1971.

## HIGHLIGHTS

This Program was initiated by legislation enacted in 1954 (Public Law 83-690). The purpose of this Program is to provide children with low-cost fluid milk.

The Special Milk Program reimburses schools, child-care centers, settlement houses, summer camps, etc., for all or part of the cost of milk served under the Program. This Program is especially important in the absence of regular food service.

Based on the information required in its application to participate, a school, child-care center, etc., serving a substantial number of needy children may qualify for total reimbursement of the cost of milk served to needy children.

The amount of milk served during Fiscal Year 1972—2.5 billion half-pints—was down slightly from the previous year. However, milk is served as part of the expanding School Lunch, School Breakfast, and Special Food Service Programs. Thus, total number of half-pints served in all Child Feeding Programs increased by 100 million half-pints to reach a total of 6.8 billion.

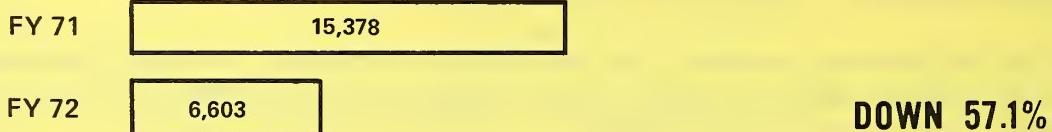

Fiscal Year 1972 Program highlights:

- The number of outlets totaled 97,200—400 fewer than Fiscal Year 1971. This Fiscal Year 1972 total includes 90,800 schools and 6,400 child-care centers.
- Federal cash contributions to the States totaled \$90.3 million—87.7 million went to schools while the remaining \$2.6 million went to child-care centers. The Federal contribution per half-pint of milk averaged over 3.5 cents.

## FEDERAL COST PER CHILD

## HIGHLIGHTS

The Nonfood Assistance Program was begun by a 1962 amendment to the National School Lunch Act of 1946 (Public Law 87-823) and redefined and expanded in the Child Nutrition Act of 1966.

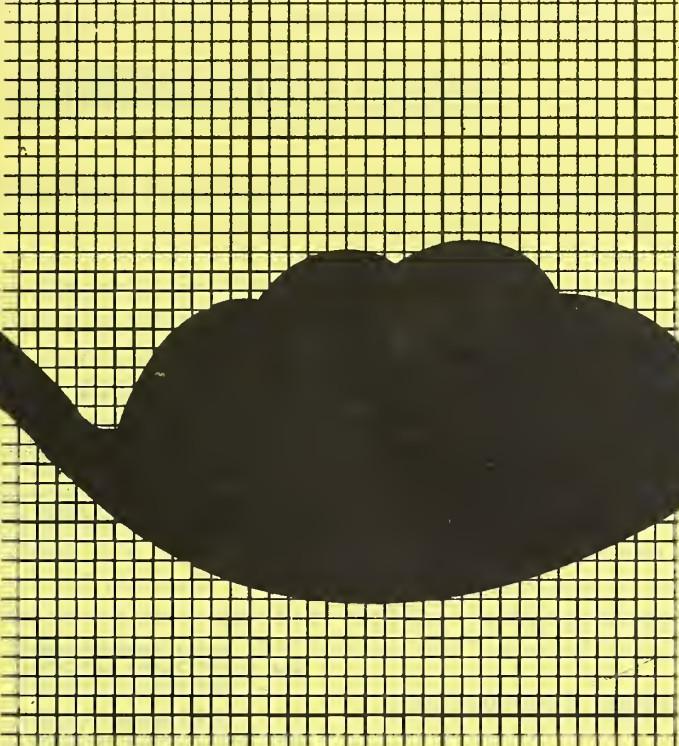

Federal aid is authorized—via the Nonfood Assistance Program—to help schools and service institutions in economically-depressed areas to purchase or rent equipment needed to establish, maintain, and expand food services. Up to 75 percent of the total price of the equipment including installation charges is available, with the remaining 25 percent to be supplied from sources within the State (excluding children's payments and Federal grants to the food service).

The limited Nonfood Assistance funds are primarily intended to help schools and service institutions in needy areas that have no equipment or inadequate equipment. To receive funds, a school must demonstrate its needy status by one of several methods, such as drawing a high proportion of its attendance from areas in which poor economic conditions exist. Also, the school must agree to participate in either the School Lunch or School Breakfast Program.

Fiscal Year 1972 Program highlights:

- Some 6,600 schools received Nonfood Assistance funds—almost 5,400 in schools with existing programs, and 1,200 in new program schools. This was less than half the number of schools that received funds in Fiscal Year 1971, indicating that progressively fewer remain without a food service program.
- Over \$16.6 million in funding was distributed during Fiscal Year 1972 (\$9.2 million for schools with an existing program, and \$7.4 million for new program schools).
- The average expenditure per school was over \$2,500—6.5 percent greater than in Fiscal Year 1971. The average for existing schools was about \$1,700 while the average for new schools was almost \$6,200.
- Average daily attendance in schools receiving Nonfood Assistance funds totaled 3.1 million children—almost 4.7 million less than the 7.7 million in attendance in Fiscal Year 1971. Of the 3.1 million children in Fiscal Year 1972, 2.5 million were in existing operations while the remaining 0.6 million were in schools that initiated a new program.

## HIGHLIGHTS

Significant progress was made during Fiscal Year 1972 in reaching more of the eligible poor with Family Food Assistance.

Two major Family Food Assistance Programs were administered by the Food and Nutrition Service during Fiscal Year 1972: Food Stamp and Food Distribution. Together, these programs were available where 99.9 percent of the total U.S. population lives. Food stamps were available to 80.2 percent and donated food to 19.7 percent. Only 19 counties, with combined population of less than 200,000 persons, remained uncommitted to a Family Food Assistance Program.

Eligibility for the Food Distribution Program is generally geared to each State's welfare standards, while for the Food Stamp Program it is based on national eligibility standards that consider net monthly income and liquid and nonliquid assets. Generally, all persons in households receiving public assistance and having food preparation facilities are eligible to participate. Nonpublic assistance households are eligible if their incomes and resources fall below the maximum levels.

Achievements for the year ending June 30, 1972:

- Some 15.6 million participants were reached with a Family Food Assistance Program during the fiscal year—about 600,000 more than the previous year.
- Expenditures totaled over \$2.1 billion—\$265 million more than was spent the year before.
- Government contribution per person per month remained about the same for the Food Stamp Program, but increased by almost 6 percent for the Food Distribution Program.

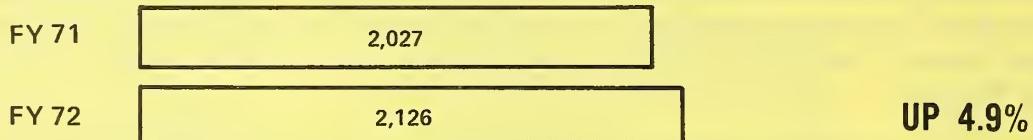

In addition to the two major programs, needy persons were helped in the following ways:

- **Institutions**  
Nearly 2.7 million persons received almost 125.6 million pounds of donated foods at a cost to the Government of \$25.8 million.
- **Disaster Relief**  
During Fiscal Year 1972, donated foods and bonus food stamps were issued to aid almost 200,000 victims of natural disasters, at an overall cost of nearly \$1.8 million.
- **Supplemental Food**  
Nearly 192,000 persons received more than 64 million pounds of donated foods at a cost of nearly \$12.9 million. These foods are distributed to pregnant women, mothers of infants, and children up to age six.
- **Food Certificates**  
In Fiscal Year 1972, 11,000 women and children in five project areas received over \$1 million in federal funds. Certificates are used for the purchase of specified nutritious foods at retail stores.

## BENEFITS PER PERSON

## HIGHLIGHTS

The operation of a pilot Food Stamp Program, beginning May 12, 1961, led to the enactment by Congress of the Food Stamp Act of (August 31) 1964. The Act authorized a food stamp program to increase the food buying power of low-income households, through Federal food stamps.

The Program first reached one million persons during Fiscal Year 1966. This fiscal year the Program served a yearly average of a little over 11.1 million persons, reaching almost 11.6 million in June, the peak month.

The average bonus per person per month (the Federal subsidy or Government cost-per-person per month) has increased from \$7, when the pilot operations began, to \$13.48 this year.

The Food Stamp Act of 1964 (P.L. 88-525) was substantially amended by Public Law 96-671 on January 11, 1971. Some of the benefits provided by the new law were:

- Uniform national standards of eligibility to replace the previously inequitable State-by-State Welfare standards,
- Free food coupons for the lowest income households and payments not in excess of 30 percent of income for all other households.
- A provision to permit disabled elderly persons to use food coupons to purchase meals prepared and delivered to them by authorized nonprofit organizations.

Fiscal Year 1972 Program highlights:

- Food Stamp available in areas containing 80.2 percent of the Nation's population.
- Year-end participation totaled 11.6 million—1 million more than a year earlier.
- Needy families received additional food purchasing power of almost \$1.8 billion. Total issuance value was \$3.3 billion.
- Over 17,000 additional retailers and wholesalers were authorized to accept food coupons, bringing the total to nearly 169,000 authorized firms.
- Over \$770,000 in bonus food stamps was distributed to almost 42,000 disaster victims.
- The Program had a net gain of 99 projects.

## HIGHLIGHTS

The pilot Food Certificate Program was initiated in response to a May 1969 directive. The purpose of the pilot program is to determine whether a Food Certificate method can be an effective way of bringing nutritious foods to infants, expectant and nursing mothers through retail stores.

The five pilot projects all began in 1970, the first in Chicago during February, and the last during August in Newport and St. Johnsbury, Vermont. The program is designed to provide extra nutritional foods for low-income women, during and after pregnancy, and their infants up to 1 year of age.

- Compared to the previous year, the Federal cost of donated foods to all outlets (schools, institutions, and needy families) totaled \$652.0 million—up 4 percent from the previous year.
- Two special programs—"Drive to Serve" and "Meals on Wheels"—stimulated nutritional improvements among the needy, elderly, and handicapped.

The Program provides \$5.00 worth of certificates each month to women during pregnancy and for the 12 month period following the birth of the baby. Certificates valued at \$10 per month are also provided for each infant through 12 months of age. These food certificates may be used to purchase whole or skim milk, commercially prepared concentrated or powdered infant formulas, instant pre-cooked infant cereal, nonfat dry milk, and evaporated milk.

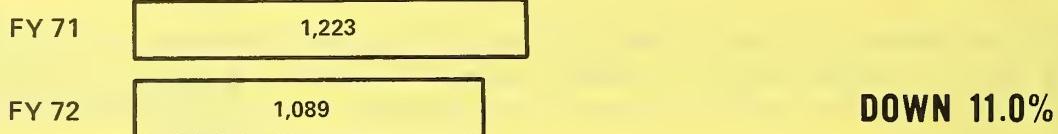

Fiscal Year 1972 highlights for the five projects:

- Fiscal Year 1972's year-end participation of 11,254 was almost 11 percent below 1971's year-end of 12,614.
- Total Federal cost was up 8 percent from Fiscal Year 1971.
- Benefits per person per month averaged \$7.25—1 cent higher than the previous year.

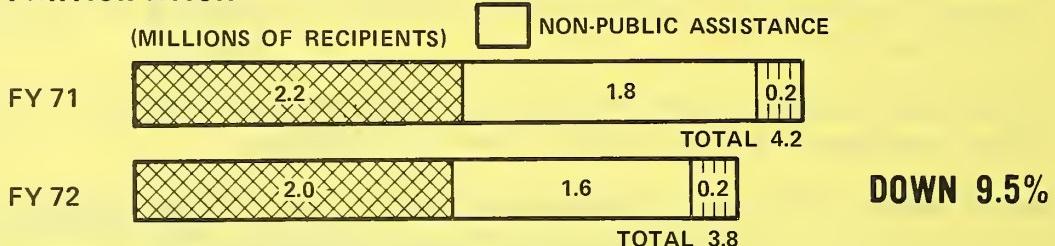

# FOOD DISTRIBUTION PROGRAM

**FY 1972  
COMPARED  
TO FY 1971**

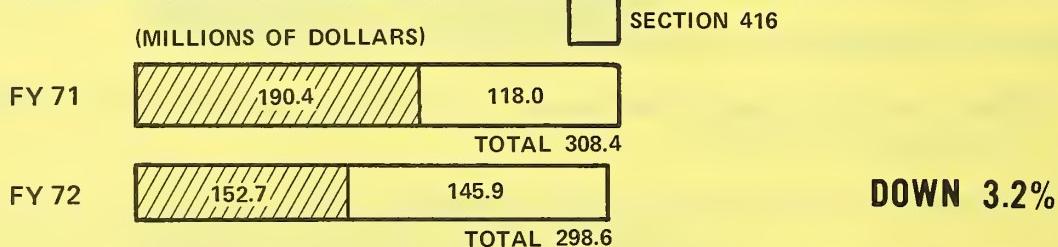

## **PROJECT AREAS**

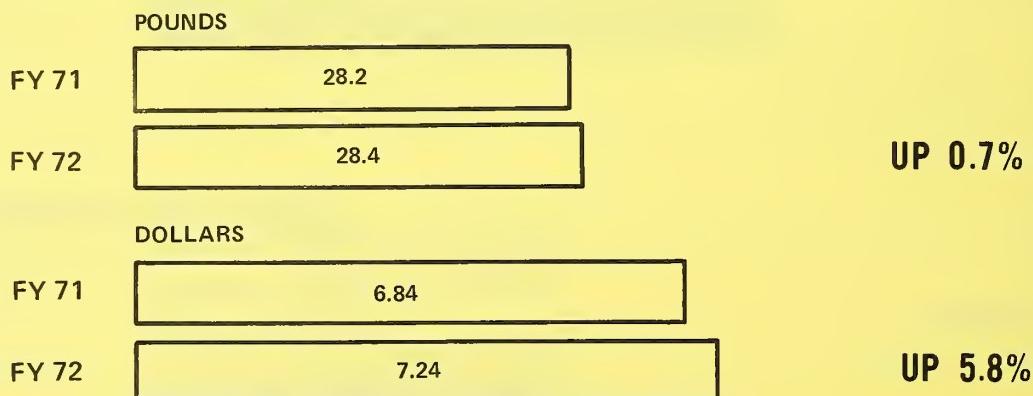

## **PARTICIPATION (PEAK)**

## **FEDERAL COST OF DONATED FOOD**

## **BENEFITS PER PERSON**

## HIGHLIGHTS

The Food Distribution Program (formerly called Commodity Distribution) was established by the Purchase of Agricultural Commodities for Donation to Federal Surplus Commodity Corporation Act of 1936 (Public Law 74-440).

The distribution of food aided over 10 million persons in Fiscal Year 1936, dropped to 8.4 and 8.8 million the next 2 years, then reached a peak of 12.7 million during Fiscal Year 1939.

Participation dropped during World War II years to a low of 60,000 in 1946. The Program reached a post-war peak of 7.4 million participants in 1962.

The decline since 1962 is generally the result of Food Distribution projects switching to the Food Stamp Program. This trend has accelerated since 1970.

The food "package" distributed in Fiscal Year 1972 was unchanged from Fiscal Year 1971. This package included canned meat and poultry, a variety of canned vegetables, fruit and vegetable juices, egg mix, cheese, butter, evaporated milk and other nutritious foods such as beans, peanut butter, and instant potatoes.

Additional steps were taken during the fiscal year to meet the specific needs of certain groups. For example, dry infant formula was provided for Navajo children, and kosher foods were provided to schools in New York. Another innovation was the new label designs which include names on items and recipes written in Spanish.

### Fiscal Year 1972 Program highlights:

- The average value of the food package actually distributed increased to \$7.24 per month from Fiscal Year 1971's \$6.84.
- Some 1,089 project areas distributed food to 3.6 million needy—a decrease of 134 projects with some 357,000 fewer persons than in Fiscal Year 1971.
- The overall total of 3.8 million persons receiving donated foods included almost 158,000 Disaster Relief victims who received over 3 million pounds of food costing nearly a million dollars.
- The Department negotiated 1,417 processing agreements in 23 States.
- Compared to the previous year, the Federal cost of donated foods to all outlets (schools, institutions, and needy families) totaled \$652.0 million—up 4 percent from the previous year.
- Two special programs—"Drive to Serve" and "Meals on Wheels"—stimulated nutritional improvements among the needy, elderly, and handicapped.

## HIGHLIGHTS

The Supplemental Food Program began during Fiscal Year 1969 under Section 32 of the Agricultural Act. The Program was first authorized by the Department of Agriculture and Related Agencies Appropriation Act of 1969 (Public Law 90-463). The Program was designed to provide selected, highly nutritious foods to low-income persons considered especially vulnerable to malnutrition—that is, women during pregnancy and for 12 months after the baby's birth, infants under 12 months, and children through 5 years of age.

Since the Program opened, participation grew from 40,000 the first year to over 200,000 in Fiscal Year 1971, dropping slightly during Fiscal Year 1972.

Foods distributed during Fiscal Year 1972 included an assortment of canned vegetables, fruit juices, canned meats, scrambled egg mix, peanut butter, and dried milk for children over 1 year old and mothers. In addition, USDA provided evaporated milk, corn syrup, farina, and some fruit juices for infants under 1 year of age.

The Department donates the food and pays the cost of delivery to points designated by the State distributing agencies. Thereafter, title transfers to the State and all storage, handling, and distribution expenses become the responsibility of State and local agencies. Funds allocated for the program, therefore, are only for the purchase and delivery of food and not for any State or local administrative costs.

Medical authorities (doctors, nurses, or nutritionists) substantiate the need of women, infants, and children for the additional nutrients available through the Program. Persons receiving public assistance, free or substantially free health care, food stamps, or donated foods are automatically eligible.

### Fiscal Year 1972 Program highlights:

- Average monthly food distributed per recipient weighed over 33 pounds and cost an average of \$6.23—nearly 7 percent more than the previous year.
- Value of foods distributed totaled nearly \$12.9 million, about the same as in Fiscal Year 1971.
- Participation decreased from 202,000 in Fiscal Year 1971 to 192,000.
- Projects totaled 325—same as the previous year.

## **EXPLANATION OF TABLES**

### **I. TOTAL FEDERAL OUTLAY FOR ALL FNS PROGRAMS:**

The summation of cash and Federal donated commodities utilized in each of the nine Food and Nutrition Service Programs. These program costs do not include administrative or those operating costs, associated with the Food Stamp Program.

### **II. AVAILABILITY OF CHILD NUTRITION PROGRAMS IN SCHOOLS:**

- A. Total Public and Private Schools: All public and nonprofit private elementary and secondary schools in the 50 States, District of Columbia, and Territories (American Samoa, Guam, Puerto Rico, Virgin Islands, and Trust Territories).
- B. National School Lunch Program (NSLP): National School Lunch Program schools are those that entered into an agreement with the Department of Agriculture to:
  1. Serve Type A meals (prescribed food components meeting approximately one-third of the daily nutritional requirements) and
  2. Have an acceptable policy that will provide needy children with free or reduced-price meals.
- C. Breakfast Program: Those schools serving breakfasts that receive funds under the Child Nutrition Act.
- D. Nonfood Assistance Program: Represents the total number of schools that used one of the following sources of aid for the purchase of food service equipment:
  1. Child Nutrition Act Funds
  2. Supplemental Section 32 Funds

### **III. CHILD NUTRITION PROGRAMS IN SCHOOLS:**

These schools operate under the National School Lunch Act of 1946, as amended, and/or the Child Nutrition Act of 1966, as amended.

- A. Participants: This term is synonymous with children reached and is based on adjusting the number of meals served daily by State to account for absenteeism. The national absentee rate was 8.2 percent during Fiscal Year 1972. The resulting participation is an average number for a peak month, nationally. Participation would be higher if each State's individual peak were considered, or if reports were based on the largest number of meals served on a single day. Participation also assumes that the same child eats every day when in school.

- B. Peak Reached: The average number of meals served daily or the number of participants served during the peak month, nationally. Individual States could have a different peak month, thus, the numbers shown tend to understate the children reached.
- C. State Administrative Expense (SAE): Covers funds apportioned to States (approximately \$3.0 million in Fiscal Year 1972) in order to provide financial assistance to the States for administering USDA Child Feeding Programs.
- D. Federal Cost of Commodities: The cost of all donated commodities that are provided by USDA.
  - 1. USDA sources:
    - a. Section 6: Special funds authorized under the National School Lunch Act, for NSLP schools;
    - b. Section 32: commodities purchased with surplus-removal funds authorized under the Agricultural Adjustment Act of 1935 (P.L.320), as amended; and
    - c. Section 416: Commodity Credit Corporation price support commodities authorized under the Agricultural Act of 1949, as amended.
  - 2. Types of schools provided donated foods:
    - a. National School Lunch Program schools.
    - b. Breakfast Program schools.
    - c. Commodity-Only schools: Those schools receiving only Section 32 and 416 commodities. These are public and nonprofit private schools that have a food service program and receive USDA-donated commodities, but do not participate in the National School Lunch Program. They are not eligible to receive cash reimbursements or Section 6 Commodities.

Note: Commodity costs for the breakfast program were estimated by the Child Nutrition Division to be about 3 cents per breakfast in Fiscal Year 1972. This cost has been deducted from the total cost of food distributed leaving the remainder to represent the cost of NSLP schools and "commodity only" schools.

- E. Federal Program Outlay is the same as All Federal Outlays except that it excludes State Administrative Expense (SAE):
  - 1. Federal Program Outlays per child are based on dividing the number of participants reached during the peak month (see III., A.) by the total Federal Outlays, excluding SAE.

2. Federal Program Outlays per meal is based on dividing the total number of meals served by Federal Outlays excluding SAE.

#### **IV. SPECIAL MILK PROGRAM:**

Number of outlets refers to the peak number of schools and child-care institutions for which claims have been approved during a single month for each type of outlet, nationally.

#### **V. SPECIAL FOOD SERVICE PROGRAM:**

Special Food Service Programs serve children of school age or under, in non-residential, non-school institutions such as child-care centers, settlement houses, and recreation centers.

- A. Year Round: Establishments operating a program all through the year, generally serving preschool children.
- B. Summer Only: Programs operating about 50 days during the summer usually in July and August. The summer-only programs primarily serve school age children.
- C. Number of Outlets: The peak number of institutional outlets for which claims have been approved for a single month, nationally.
- D. Average Daily Attendance: The number of children actually attending daily, as opposed to enrollment.
- E. Total Meals Served: Includes the total number of meals served in year-round and summer only outlets and includes the total for the following types of meals:
  1. Breakfasts
  2. Lunches
  3. Supplemental Meals (snacks)
  4. Suppers
- F. Federal Contributions:
  1. Cash: Includes Section 13 (National School Lunch Act) funds and Section 32 funds used for equipment in Fiscal Year 1972.
  2. Commodities: Includes the Federal cost of all Federally-donated commodities. (See VI., A., 1., c.)

## **VI. FOOD DISTRIBUTION PROGRAM:**

- A. Outlets. Refers to the number and kinds of outlets reported by the States as receiving federally donated foods. Types of outlets include the following:
1. Schools: Includes schools operating a lunch or breakfast program under the National School Lunch Act as well as non-profit schools not participating in the National School Lunch Program but providing elementary and secondary children with food service on a nonprofit basis. Subclasses of schools based on types of commodities utilized includes:
    - a. Section 32 and 416 outlets: Includes all schools—Lunch, Breakfast, and “Commodity Only” schools.
    - b. Section 6 Outlets: Includes only National School Lunch Program schools.
    - c. Special Food Service Outlets: Child feeding outlets (institutions, not schools) obtaining only Section 32 and 416 foods. For the purpose of this table and the allocation of donated foods, Special Food Service outlets are grouped under schools.
  2. Institutions: Include all nonprofit outlets, other than Special Food Service outlets, receiving Section 32 and 416 and foods only. Institutions are divided into the following two categories:
    - a. Year-round: Outlets operating on a year-round basis, such as nonprofit orphanages, old age homes, hospitals, etc.
    - b. Summer Camps: Nonprofit summer camps operating between June and September.
  3. Needy Persons: Individual participants as a class of outlets receiving Section 32 and 416 commodities directly. Recipients in this category include:
    - a. Needy Families: The number of persons participating in the Needy Family Food Program during the peak participating month in Fiscal Year 1972.
    - b. Supplemental Food: The number of eligible mothers, pregnant women, and children 5 years of age or under, provided with a specially designed package of donated foods in order to meet their nutritional needs. The participation data are based on the peak month of operation in Fiscal Year 1972.
    - c. Disaster Relief: The number of people helped is based on reports received from the State Agencies involved in disaster relief operations.

- B. Persons Participating: Persons receiving the benefits of federally donated goods in each of the outlets described above (see VI., A).
- C. Pounds: Includes those pounds of all commodities reported by the States as distributed to program recipients during Fiscal Year 1972.
- D. Federal Cost for Commodities: The actual acquisition cost, plus those transportation and storage costs incurred by the USDA.
- E. Cash Assistance to States for Needy Family Program: Cash funds allocated directly to the State Agencies for the purpose of providing financial assistance to the States for distributing USDA commodities.

## **VII. FOOD STAMP PROGRAM:**

- A. Projects: Operating units that generally coincide with counties, but also include welfare districts, independent cities, Indian Reservations, and partial counties. A project may also include more than one county.
- B. Persons Participating: The number of participants reached at the end of the Fiscal Year, i.e., June 1972.
- C. Coupons Issued: Food Stamp coupons actually issued to Food Stamp recipients during the Fiscal Year.
  - 1. Total Coupons: The total value of coupons issued equals the cash amounts paid by the recipients, plus bonus coupons.
  - 2. Bonus Coupons: The value of Food Stamp Coupons that are provided free by USDA.
